Ready to bloom

HG Infra Engineering (HG) is an EPC company with focus on highways, roads and bridges in addition to civil works and water supply projects. It has been a sub-contractor for established players like L&T, Tata Projects and IRB Infra. Strong and persistent execution has helped it transform from a sub-contractor to a frontline EPC bidder. HG has grown to pre-qualify for projects up to Rs 11.2/16.0bn in EPC/HAM respectively. The transformation is visible, with HG quadrupling its revenues over FY13-18.

With a further pickup in NHA orders in 2HFY19E, EPC players will only add to their FY18E book/bill of ~ 3.3x. This should address longevity concerns on their earnings up-cycle. For HG, EPS should rise to Rs 24.7/sh in FY20E. HG has a firm grip over working capital (and hence, debt) and should deliver high RoEs >20%. We initiate coverage with a TP of Rs 386/sh (valuing core EPC operations at 15x FY20E EPS). BUY

Investment arguments

- **Healthy balance sheet:** Post the Rs 3bn IPO in Mar-18 and a portion being utilized towards debt reduction, we expect HG's net D/E to reduce from 1.1x in FY17 to 0.2x by FY19E. With stable EBITDA margins ~14-15%, tight control on finance costs (FY19/FY20E interest coverage – 6.4/7.0x), HG should deliver 38.3% FY18-20E EPS CAGR with PAT multiplying 1.9x.
- **Stable WC cycle:** HG's NWC cycle is one of the best in the industry and has averaged between 40-65days over FY13-17 (FY18 NWC of 96 days is an outlier as

execution was skewed sharply towards 4QFY18 – Rs 5.0bn). Along with execution, the low debtor days (25-50days over FY13-17; 73days in FY18) are also attributable to a large part of backlog from NHA/State Govt. with good payment terms.

- **Further sub-contracting to be only at juicy margins:** With HG now capable of independently winning big ticket road projects, it will bid conservatively. This can also be seen in the recent Rs 11.7bn IRB win where it provided a support bid at the pre-bid stage only.
- **Foray into HAM:** With >50% of big ticket NHA projects expected to be under HAM and with HG prequalified to bid independently, we expect HG to further add to its order backlog post the recent Gurgaon-Sohna package win of Rs 6.1bn.
- **Near-term outlook:** With (1) A steady flow of awards in the roads segment, (2) ~3.3x book to bill (excl. post FY18 wins) (FY18 revenue), (3) Steady 14-15% EBITDA margins and (4) Stable finance costs, we expect HG to post a 38% earnings CAGR over FY18-20E. This translates into >20% RoE and 17-20% RoIC over FY19-20E. HG is among our top picks in the small cap EPC space.

HG's order book/revenue grew ~9x/4x respectively over FY13-18, driven by Govt. lead focus on Roads Projects ordering

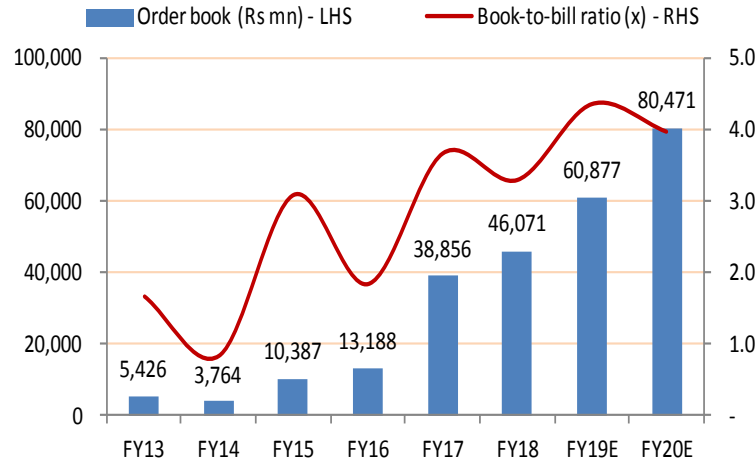

Bharatmala Pariyojana is expected to provide sustainable ordering visibility over FY19-21E and we model for 35% revenue CAGR over FY18-20E

HG is eyeing new HAM projects with 100-150bps higher than direct EPC project EBIDTA margins (which have high competitive intensity)

Even in EPC the subcontract jobs are at 13-14% EBIDTA margins as HG is giving its support bid at pre-bid level and partnering with developers

Expect HG to deliver high RoE in excess of 20% by FY20E on back of 38.3% EPS FY18-20E EPS CAGR

- We expect the W/C cycle for HG to remain between 60-65 days despite scaling up operations significantly. Historically, NWC has ranged between 35-65 days over FY13-17 which is one of the best in the road construction industry. FY18 marked a significant increase in Debtors as well as Payables on account of significant execution ramp up to Rs 5bn in 4QFY18 (vs. Rs 8bn in 9MFY18), leading to bloating up of WC days.
- HG has traditionally been able to maintain a lean working capital cycle as roads projects are largely NHA/State funded and have 45-50days of payment period. On the private side, HG has well established relations with IRB, having successfully executed projects in the past and Government being the indirect client.
- With WC under control we expect HG to continue clocking positive operating cash flows over FY18-20E and positive FCFF over FY19-20E.
- Significant capex incurred in FY18 pre-IPO resulted in negative FCFF. We expect an annual capex outlay of Rs 0.8-1.1bn over FY19-20E.

With WC under control we expect HG to continue clocking positive operating cash flows over FY18-20E and positive FCFF over FY19-20E

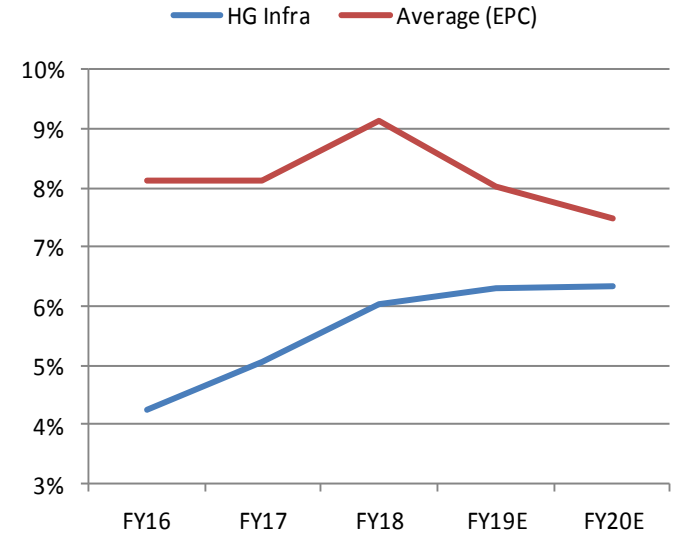

Over FY16-18 HG EBITDA margins expanded as it started winning NHAI/MoRTH contracts on its own (vs. subcontracting earlier)

After clocking 39.8% revenue CAGR over FY16-18, we expect HG to clock revenue CAGR of 35.2% over FY18-20E

HG has maintained a leaner WC cycle vs its peers

Post the IPO in Mar 18, HG net D/E is 0.45x vs 1.1 in FY17. Net D/E would reduce further to 0.2x in FY19E

Expect debt to continue to remain low as any further HAM wins would have provision of 10% mobilization advance and tight WC management will keep WC debt in limits

FY18 book to bill stands comfortably at 3.3x (ex-YTDFY19 win of Rs 11.7bn from IRB) vs peer group average of 3.6x

Road sector – Historically high order books

- With NHAI awarding a record Rs 1.2tn of projects in FY18, the pace and scale was enough to lead to most road - EPC companies to bag a handful of orders.
- HG is comfortably placed with a 3.3x book to bill ratio before considering the Rs 11.7bn IRB contract.
- With another >7,000km of ordering likely by NHAI in FY19E, along with other opportunities in state road

projects and subcontracting works, we expect HG to have enough on its plate for the next 2-3 years.

- With the HAM model is seeing increasing acceptance among developers and with HG now prequalified to bid independently (HG has already won 1 HAM project in Gugaon-Sohna), we expect it to grab another package or so once the existing one moves into execution.

Source: Company, HDFC sec Inst Research *ITD Cementation FY19E/FY20E should be read as 15MFY19E/FY20E, 16th August 2018 Prices

We have valued the core construction business at 15x one-year forward Mar-20E EPS at Rs 371/share and HAM equity invested at 1x P/BV – Rs 15/sh.

We arrive at SOTP based TP of Rs 386/sh

HG is trading at 9.5x FY20E earnings which is marginally higher than Roads - EPC peer average of 9.3x

Outlook And Valuation

Target Price of Rs 386/sh implies ~64% upside

Valuation methodology

- We have valued the core construction business at 15x one-year forward (a 15% discount to our peer average of 18x) Mar-20E EPS at Rs 371/share. Discount is attributable to (1) Large share of Revenue dependence on subcontracts from developers & (2) Limited listing history.
- Multiple revision in future is contingent to (1) A continual flow of awards in the roads segment, (2) More direct project wins, (3) EBIDTA margins surprise beyond 14.5-15% EBITDA margins on new HAM wins,
- (4) Stable interest costs and a healthy balance sheet with net D/E likely to reduce to 0.2x by FY19E.
- With another round of 7,000km + awards by NHA likely in FY19E, we do not expect HG to face any serious challenge to further expand its order book.
- Given its strong credit history, a robust balance sheet, strong revenue visibility, control over WC and execution track record, we expect HG to continue to demonstrate exceptional execution and earnings growth trajectory.
